- a. Hage Elementary, Galvin and Ice Skate Place – Joel Rizzo City Traffic Engineer

- i. City looked at safety around Hage. Signs are under standard and will be upgraded.
 - ii. Increased red at curb near parking entrance from 5' to 25' to increase visibility.
 - iii. Per the engineering study the Galvin/Ice Skate Place intersection does not warrant a stop but there is an alternate process which allows the community to request a stop sign be added.
- b. Galvin Ave and Ice Skate Place – John Horst
 - i. Requesting MMCPG support for stop signs at this intersection for safety of school children and others. Recently someone was hit and there have been a number of near misses. A petition was presented with 168 names. All but 3 support a stop sign in both directions.
 - ii. Slide show demonstrated the situation. It is hard for drivers to see far enough ahead and the sun is blinding at the morning commute/go to school time.
 - iii. It was noted if a stop sign is added a cross-walk would be added too. There is not one at this time.
 - iv. It was also noted that Hage has tried safety patrols but it did not work. Also Hage will be changing their drop off to wrap around the school which should help traffic flow.
 - v. There was a comment this should not be considered without looking at the traffic situation with the no left turn signs relative to Capricorn.
 - vi. City staff indicated there was an ongoing study on the no left turn signs. Measurements were taken with the signs in place recently. Signs will be bagged for a period of time and measurements will be taken during that time. MMCPG asked City staff to come to our next meeting to talk about the study.
 - vii. There was a question about why we were looking at just this school and suggestion we should look at other schools to see if an added stop would improve their safety. The MMCPG agree to add this to a future agenda.
 - viii. There was a motion to support a stop sign be added in both directions at Galvin Ave and Ice Skate Place and that we ask the City to move forward with the alternative process to have this approved by Council.
(Brown/Rose) The motion was passed 14-0-0.
- c. CALTRANS DAR at I-15 project- there was a question about the response to comments. It was explained that the responses would be made as part of the final document when CALTRANS publishes it. One resident asked if the group had discussed the DAR. He was reassured it had been discussed at length and will have more discussion in the future. Also that Councilman DeMaio will hold a citizens forum on the subject.
- d. Mira Mesa Blvd Pedestrian Overpass – Michael Edmond
 - i. Michael presented an update report on the pedestrian. Funding is still a question. The MMCPG indicated there is a pedestrian bridge in the FBA. Planned location was near Miramar College. We should consider if that is still the best location.

- ii. Another resident brought up the question of whether Mira Mesa Blvd is considered a military access route as he remembers that was an issue for building overpasses in the past. The height made it too expensive. Juan will check to see which if any roads in Mira Mesa are affected.
- iii. Children safety was brought up. Parents will not allow their children to use the bridge if they can not be seen. There must be no hiding places criminals.
- iv. Must be ADA compliant.
- v. Board agreed to look at the issue of the pedestrian bridge in the FBA process
- vi. It was noted that the pedestrian bridge at UTC is approximately \$4 mil without and elevator.

7. New Business
